DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 6-10, drawn to methods of thermally treating a magnetic layer of a wafer comprising applying at least one local magnetic field to the magnetic layer.
- II. Claim 5, drawn to a method of thermally treating a magnetic layer of a single wafer comprising heating the magnetic layer in the presence of a magnetic field.
- III. Claims 11-14, 16, 17, and 26, drawn to methods for processing a magnetic stack including applying a local magnetic field to a magnetic layer of a single wafer.
- IV. Claim 15, drawn to methods for processing a magnetic stack comprising simultaneously annealing separate locations of a single wafer with a fast anneal in the presence of a magnetic field.
- V. Claims 18, 20-25, and 27, drawn to apparatus.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV and Invention V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

Art Unit: 1725

(MPEP § 806.05(e)). In this case the apparatus can be used for heating a magnetically clamped article.

Because these inventions are distinct for the reasons given above and the search required for Groups I-IV is not required for Group V, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-4 and 6-10, drawn to methods of thermally treating a magnetic layer of a wafer comprising applying at least one local magnetic field to the magnetic layer.
- II. Claim 5, drawn to a method of thermally treating a magnetic layer of a single wafer comprising heating the magnetic layer in the presence of a magnetic field.
- III. Claims 11-14, 16, 17, and 26, drawn to methods for processing a magnetic stack including applying a local magnetic field to a magnetic layer of a single wafer.
- IV. Claim 15, drawn to methods for processing a magnetic stack comprising simultaneously annealing separate locations of a single wafer with a fast anneal in the presence of a magnetic field.
- V. Claims 18, 20-25, and 27, drawn to apparatus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
